

Commonwealth Inc.

Seamless Distribution Solutions

A Partnership To Manage Your Inventory They Way You Want To

Commonwealth, Inc. utilizes 3PLink, developed by 3PL Software. 3PLink is a fully integrated Warehouse Management and Accounting System for the third party logistics industry. This package utilizes current technology from Microsoft Business Solutions' DynamicsNAV to provide the user with ultimate flexibility at an excellent value.

This graphical user interface utilizes:

- The latest technology tools such as .NET, XML, MAPI (email interface), and Web Enabled
- A 64-bit application designed for Windows NT and Novell users
- Fully integrated accounting
- A variety of powerful module options to customize each system based on your individual needs
- Compatibility with Microsoft applications

3PLink uses the latest technology to assure that our system will grow with your business as information becomes more widely distributed throughout your organization.

3PLink is based on the highly successful Public Warehouse/Classic system, which was developed and refined by working closely with users in the warehousing and logistics industry for over 15 years. 3PLink is designed and enhanced by both programmers and users also with years of experience in the warehousing and logistics industry.

You will see these benefits when using 3PLink:

- Flexibility to record inventory data in the format and detail level that you require.
- Extensive reports, which can be customized to your needs.
- WebPortal – Web based presentation of your inventory and transactions.
- Automated email of shipping and receiving transactions and timely reports.
- EDI, XML and spreadsheet automated data interfaces.

Let us know how we can bring our warehousing and logistics expertise and systems into partnership with you to reach your goals.
